

UNLOCK THE BRILLIANCE IN THE BUILDING

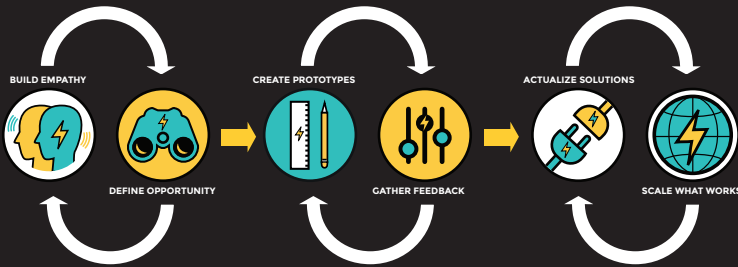

We believe educators on the ground represent the single greatest force in transforming student outcomes.

We partner with districts, organizations, and governments to empower educators to lead innovation.

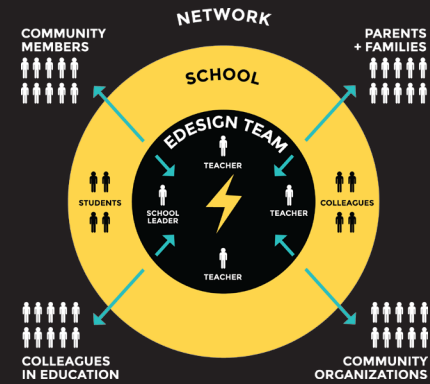

Together, we actualize true or fully realized schools— places of limitless potential for people and learning.

PROCESS TO EFFECT CHANGE WITHIN SCHOOLS

We identify and develop teams of educators who gain knowledge, skills, and mindsets of student-centered design to build new learning models for improved student outcomes.

NETWORK TO LEARN ACROSS SCHOOLS

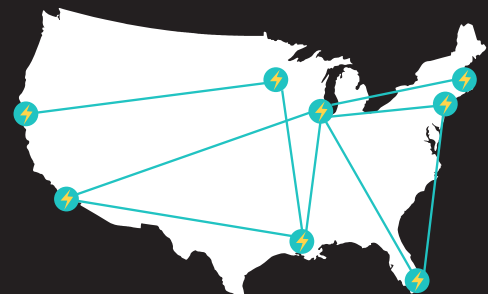

We build and connect a global network of educators who share models, tools, and strategies to rapidly address systemic challenges.

TRUESCHOOL HAS WORKED WITH 102 SCHOOLS TO LAUNCH NEW LEARNING MODELS, SUCH AS:

BELMONT CRAGIN Leveraged team time for literacy acceleration	BROOKS Built an integrated curriculum for real world STEM learning	SAN MIGUEL Developed a rubric for character learning and growth
NORWOOD Created a physical environment to enable student choice	MONROE Supported students successful transition to high school	IRVING PARK Launched a student-led approach to learner profiles
